

Paul asked some shoppers how they had travelled to a supermarket. He recorded their answers on a tally chart and then drew a pictogram to show his results.

Travelling to the Supermarket

1. Copy and complete the following to show how Paul's tally chart may have looked.

Car	
Bus	
Walk	
Bicycle	
Other	

- How many people walked?
- How many people used a bicycle?
- Which mode of transport was used by 12 people?
- How did most people travel to the supermarket?
- How many people did NOT travel by car?
- What is the difference between the number of people who came by car and the number of people who rode a bicycle?
- How many people did Paul ask altogether?
